Beyond AI: Preparing children for tomorrow

Education today stands at an interesting crossroads. Artificial Intelligence is changing how students today access information, complete tasks, and learn. The answer, however, is not to keep technology away from children, but to teach them to use it intelligently, ethically and purposefully.

Student Speak

At Apeejay School, Pitampura, we believe AI should be a learning assistant, not a substitute for learning. Students may use AI to explore ideas, clarify concepts, generate questions, or examine problems from different perspectives. But they must be encouraged to question responses, verify information and arrive at their own conclusions. Asking the right question, analysing an answer and distinguishing reliable from unreliable information will become as important as knowing the information itself.

This also changes the role of the teacher. The teacher is no longer merely a source of information; with information available instantly, teachers become mentors, facilitators and critical-thinking partners. Teachers help students connect information with experience, challenge assumptions, collaborate with others, and develop their own voice. Technology can provide answers; it cannot replace the wisdom, empathy and judgement a teacher brings to learning.

At the same time, schools must establish clear ethical boundaries around AI. Students need to understand the difference between using technology to support learning and using it to do their learning for them. Academic integrity, originality, attribution and responsible digital behaviour must become integral to AI literacy.

The future of work makes this even more important. The world of work is changing rapidly, and many careers our children will pursue may not exist today. Therefore, schools cannot limit career preparation to a fixed list of professions or technical skills. Our responsibility is to equip students with the ability to learn, unlearn, and relearn throughout their lives.

At Apeejay School, Pitampura, we run clubs in AI, Robotics, Financial Literacy and entrepreneurship because we value skills that remain important even when technology and job roles change–critical thinking, creativity, communication, collaboration, adaptability, resilience and problem-solving. Equally important is confidence in facing uncertainty and willingness to learn from failure.

Career education should begin before students choose a stream or profession. Children should be exposed to different fields, real-world situations, and opportunities to discover their strengths and interests. Practical experiences can make this process more meaningful. Our Class XI students, for instance, engage in interactive activities around business enterprises, including budgeting, marketing, and planning. Such experiences help them make decisions, collaborate, solve problems, and understand how ideas translate into action.

Ultimately, the most future-ready child will not necessarily know the most technology. It will be the child who can think independently, adapt confidently, work with others, and use technology with responsibility. Our task as educators is to ensure that while children become future-ready, they remain deeply human.

Apeejay School, Pitampura

Service above self

The Interact Club of Darshan Academy, under the guidance of Mamta Sabharwal, head of the school, participated in the District Interact Leadership Assembly (DILA) organised by Rotary International District 3012. The event brought together over 700 Interactors and student leaders from more than 40 schools across Delhi NCR, offering a platform for leadership, teamwork and community service.

Led by Club Coordinator and Senior Coordinator Bhavna Arora, Rotary Club student President, a delegation of 15 students from Darshan Academy actively participated in the proceedings. The assembly provided exposure to strategic project planning, leadership and teamwork, reinforcing the Rotary motto, "Service Above Self."

A highlight was the District Installation and Pinning Ceremony, marking the formal installation of the District Interact Representative (DIR) and district team, along with the ceremonial badging of incoming Interact Club Presidents.

The students were inspired by addresses from District Governor Rtn. Amit Gupta and Mr Rakshit Tandon, Cyber Security Evangelist, on purposeful leadership, strategic goal setting, ethical decision-making and community engagement. Sessions on digital safety, leadership ethics, resilience and sustainable service further enriched their learning, while interactions with student leaders offered new perspectives and strengthened their communication and collaboration skills.

The students reflected on growth mindset, empathy-driven leadership, resilience, collective responsibility and team synergy, recognising that true leadership is about making a positive difference, not merely gaining recognition.

Bhavna Arora guided and encouraged the delegation throughout, helping students reflect on how

A new chapter of leadership

Sri Venkateshwar International School held its Investiture Ceremony, marking the formal induction of the newly elected Student Council and club representatives for the academic session.

The ceremony featured a motivational song celebrating resilience and determination. The newly appointed Prayaas Ambassadors, Sustainability Champions, School Prefects, House Captains, Vice Captains, Sports Captains, and Cultural Captains and Vice Captains were announced amidst applause.

The school's apex leadership was also announced, with Arnav Vashisht from (XII) appointed as Head Boy and Devisha Malhotra as Head Girl. Granth Arora (XI) and Palak Goyal (XI) were appointed Vice Head Boy and Vice Head Girl, respectively. They pledged to uphold the school's values, discipline, and ethos with sincerity and dedication.

The Oath of Office was administered by the Head Girl, reaffirming the council's commitment to integrity and responsibility. The newly elected Head Boy and Head Girl then addressed the gathering, expressing their commitment to serving the school community.

Head of school Nishu Pandey encouraged the young leaders to lead by example, embrace challenges and pursue excellence. Senior academic coordinator Vineeta Bagga proposed the vote of thanks.

The programme concluded as the newly constituted student council took on its responsibilities with a commitment to responsible and dedicated leadership.

Young delegates, big ideas

SAM International School, Dwarka, organised its second edition of Model United Nations (MUN). The event was graced by Vice Principal Dr. Preeti Rana and other coordinators of the organising committee, followed by an encouraging address.

Students exhibited an amazing performance while embodying the members and delegates of the UNSC (United Nations Security Council), WHO (World Health Organisation) and AIPPM (All India Political Parties Meet).

The Committee Sessions provided learners a platform to hone public speaking and debating skills while developing an understanding of global issues and international organisations. Working together to build consensus and draft resolutions, students simulated international relations, strengthening their critical thinking and leadership skills. The event concluded with the Vice Principal presenting certificates and awards for Best Delegate, High Commendation and Special Mention, appreciating students and teachers for their efforts.

Innovation powered by AI

Delhi Public School, RK Puram's Omega Zen Omega AI Innovation and Incubation Centre celebrated innovative AI projects developed by students and recognised the top three outstanding achievers of its graduating batch for their contributions and academic excellence.

The occasion was graced by chief guest VK Shunglu, chairman, DPS Society and Managing Committee of DPS RK Puram, along with Anil Kumar, principal, Manoj Biswal, Head – AI Practice, VVDN Technologies, vice principals Naresh Miglani, Anil Kathuria, Mukesh Kumar and Rashmi Malhotra; Headmistress Dr Anubha Gopal; and Incharge – Classes VI to VIII, Vandana Chandoke.

The ceremony featured an exhibition of AI prototypes by shortlisted teams ASCEND, MudraPragyan AI, ReyCool, Examzy and BiblioTech, showcasing creativity, technical ingenuity and real-world applications of AI. Top-performing teams and three outstanding academic achievers were subsequently felicitated.

VK Shunglu commended the school's AI curriculum and highlighted AI's potential to shape the future. He urged students to use technology ethically and responsibly while nurturing empathy, collaboration, human values, and continuous learning.

The event reaffirmed the school's commitment to responsible technology and future-ready learning.

Your goal can change India

Student Speak

Everyone says, "Work hard to achieve your goal." Have you ever thought about why we need to achieve a goal? What is the purpose of having a goal? Why should we work hard? Don't worry; I have the answers for you.

You need to achieve your goal not only for yourself but also for your entire generation. What do I mean? Take the example of Amrita Mahale, a young author whose first book, Milk Teeth, was published in 2018. She did not become famous instantly after the publication of her book. However, she has now become a well-known name among Indian authors.

You may ask, "So, what difference does it make? How will it help us?" Amrita's goal was to become a great author and write books. Even if only a hundred children read her books, it could make a difference. Every child might start thinking in a new way.

Gradually, an entire generation could begin to think differently. That new way of thinking could not only enlighten people but also contribute to changing India. Some children might think about the problems we face today, while others might think about how to solve them. Others might work towards implementing their own solutions in new and innovative ways.

And, of course, to achieve your goal, you need to work hard. By achieving your goals, you can become an inspiration to others and bring about positive change in society.

So, just remember: Your goal can change India!

Geetanshi Bhatia, class X, St Cecilia's Public School

Serving with purpose

The Installation Ceremony of the Interact Club of New Delhi Public School, A-Block, Vikas Puri, for 2026-27. The ceremony featured the induction of newly appointed office-bearers and the Interact Oath.

Students presented a Nukkad Natak on "Save Water", Qawwali "Mere Watan Ke Jaisa Koi Watan Hai" and a dance performance on "Main Ghar Vapas Aaunga". The event was graced by rotarian RK Suri, president, and rotarian Kamal Grover, along with members of Rotary Club of Delhi Janak 3011. Principal Sankalita Modgill congratulated the young Interactors and urged them to uphold the spirit of "Service Above Self".
